Department contact:

Tip or Complaint:

Hickman's manure room fans are constantly blowing emissions out into the community. This morning, like many mornings, the breeze is in my direction. The stench is horrible like always. I am sure ammonia is in the "mix". The dander dust and other emissions force me back inside my home. My nose gets plugged, my skin itches. I went back in my home as I started getting a headache. I have acquired some wheezing and skin rash that I personally blame on Hickman's emissions. Some of the rash, I believe, is from their stable fly population. I was bitten several times last summer by their stable flies which left scars and this year rash broke out around the scars.
